ABRAHAM **COLEMAN**

Web Developer

ABOUT ME

I graduated from the University of Northern Iowa in the spring of 2015, with a degree in Computer Science. The University of Northern Iowa introduced me to Drupal in 2013. I built several different websites for Northern Iowa using the Drupal 7 platform. After graduation and various internships, I moved on to the University of Nebraska. My time there was immensely important, as my mentors taught me many of the intricacies of development, accessibility, and validation. After that, moving to the development team at Creighton allowed me to spread my wings as a developer, and have been involved in several large development projects. My time at Creighton was truly rewarding, as my coworkers were outstanding team members. I'm very excited to join NBSTRN as their web developer to be part of their amazing projects.

EXPERIENCE

Web Developer | American College of Medical Genetics and Genomics   Present
Responsible for maintaining and enhancing the new NBSTRN website alongside the NBSTRN Scientific Strategy Manager. Design, develop and maintain the NBSTRN website using a variety of technologies including Drupal, PHP, JSON, HTML, CSS, and JavaScript.

Senior Software Developer | Creighton University   2020-2021
Part of the Web Development team working on Creighton University's Drupal 7 & 8 platforms. Develop applications and adapt existing applications to operate more efficiently. Gather and receive requirements and develop moderately complex solutions that includes automated testing procedures. Work with the Operations team to ensure smooth transition to production support teams. Work within the ITIL framework and Agile development methodologies.

Web Strategist | Creighton University   2018 - 2019
Worked with the Marketing and Communication website team to develop, launch and maintain websites on the gradschool.creighton.edu and adultdegrees.creighton.edu platforms. Worked closely with the Graduate and Adult Marketing office to ensure that web strategy aligns with Graduate and Adult enrollment priorities and goals.

Web Designer/Developer | Nelnet Business Solutions   2017 - 2018
Collaborated with the Content Management Team to design, develop, and refresh website for Content Management System. Implemented look and feel decisions utilizing JavaScript, HTML 5 and CSS. Protected site content by designing, implementing and adhering to security standards for website development and/or procedures.
